

# Generalizing simultaneously to support smooth zooming: Case study of merging area objects

Dongliang Peng \* · Martijn Meijers · Peter van Oosterom

Received: date / Accepted: date

## Compliance with Ethical Standards

This research work is carried out in compliance with transparency, moral values, honesty, and hard work. No human participation or animals are involved in this research work.

## Informed Consent

Every step of processing for publication informed to all co-authors of this paper at the earliest, and everything is carried out with collective decision and consent.

## Funding

This work is part of the research programme Maps4Society with project number 17644, which is (partly) financed by the Dutch Research Council (NWO).

## Conflict of Interest

The authors declare that they have no conflict of interest.

## Ethical Approval

As per the literature review, this is neither a repetition of any work nor copied key data from other's work. The methodology, findings, and conclusions made here belong to original research work as per our knowledge and belief.
